## Computer Curricula Expands

### Computer Repair

In an effort to meet a growing demand and also to offer relevant content that expands as technology advances, the ACC has added a second year to the Computer Repair Curriculum. Students may now take a second year of Repair and advance their knowledge into individualized areas of interest, such as networking, security, and virus/malware removal.

### Computer Programming

As is with its counterpart Computer Repair, the ACC Intro to Programming class has added a second year course. Whereas the Intro course introduces students to the C# and SQL languages, the second year adds to the programming knowledge by emphasizing OOP (Object Oriented Programming) and 3d App development.

### Particulars

Whether a student takes Computer Repair, Programming, or both classes, the ACC emphasizes the application of knowledge in a simulated work environment, as well as the earning of an industry credential. Students may earn Comptia A+ certification, Testout Repair Certification, MTA, or even MOS certifications, all at no cost to the student.

### SCOTT JONES—NEW ACC AVIATION INSTRUCTOR

Coming into his first year of teaching (at a High School, he has worked as a flight instructor previously), Mr. Scott Jones has found the necessity of remote learning to be a challenge. “Aviation is a hands-on experience even from just a knowledge standpoint.” However, even in these trying times Mr. Jones has seen some very bright spots. One of his students has already done his first solo flight (student had previous flight experience) and the student was able to share the experience with his classmates. Going forward Mr. Jones has said his love of aviation and its impact on his life will be a main component he will share with his students. Welcome Mr. Jones, the ACC is glad to have you on staff!

# Renovation of the ACC

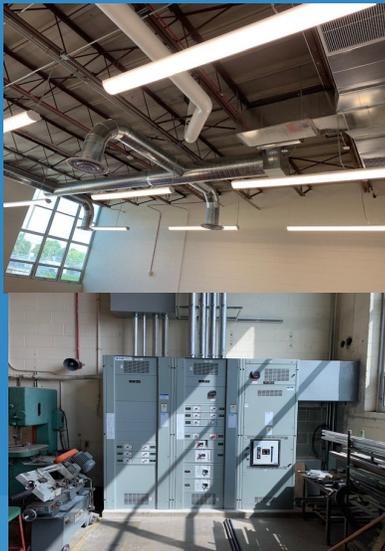

The Spring and Summer of 2020 provided for the realization of a much welcomed renovation of the East ACC Building. During this time air-conditioning, heating, windows, electrical-lighting, handicapped access, new doors, tuck pointing, new bathrooms, and painting were all completed. Many thanks to Superintendent Dr. Steve Wrobleski for his hard work in organizing the Health Life Safety Bonds that funded this project. All work was done without raising taxes on the LP community.

Above and Below: New garage doors, windows, inside doors and electrical service were all a part of the renovations.

Pictured (not visible): Cool Air from the air conditioning ☺

Below: New lighting, ductwork, electrical service, and a new bathroom punctuate some of the many infrastructure improvements.

## Student of the Month

**Morgan Shan—La Salle Peru HS**  
COSMETOLOGY

Educators of Beauty Instructor Caitlyn Carrico is proud to award Senior Morgan Shan the ACC Student of the Month Award for September 2020. Morgan is a student who has taken advantage of the in-person learning offered in her Cosmetology class. Aside from demonstrating a solid aptitude for the classwork, she has an amiable personality and a willingness to work alongside and with her classmates. She exemplifies the characteristics of a solid student and worker! Congratulations Morgan, the ACC is proud of your accomplishments!

**CNA Class Meets( In Person) October 8<sup>th</sup> for Background Checks**

**Aviation students book flight time with your Instructor!**
