

LPACC Hall of Success

Hope Bernardoni

Class of: 2017

ACC Program:
CNA

Occupation

CNA &
Biology Student
(Drake University)

Home School

LaSalle — Peru

What I Learned at The ACC

The most important thing I learned during my ACC class was how to manage my time more efficiently. Between juggling school work and clinicals, it really helped me prepare myself for the future. Another thing I learned was always to be on time, and to be prepared. People depend upon you to do your job, and to do it the right way.

My Advice to The ACC

To the current and future ACC students, take everything seriously as if that is your career. Although some of you might not want to become a CNA for the rest of your life, it is a great way to get your foot in the door in the healthcare system. The ACC program is an excellent start. With all the different areas the ACC has it provides a variety of different paths you can choose from. Try everything out, and don't be afraid to ask for help during your program. The program is there for you to better your skills and to help build your future.
