## What I Learned at The ACC

By being in that class it gave me perspective on becoming an early childhood education teacher. I was a teachers assistant for 3 years after I graduated but then I had my own child.

## My Advice to The ACC

Just to know that sometimes life can be unexpected and if you choose to follow your dreams then you'll be successful. I tried to follow them and be a teacher but due to having my own children it changed my perspective on being a teacher because I am able to teach my own children.
