

LPACC Hall of Success

Anthony
 Aughenbaugh
 Class of: 2018
 ACC Program:
 CAD I and II

Occupation	Intern at Black Brothers
Home School	Mendota HS

What I Learned at The ACC

I learned that everything goes into the Engineering Process. Starting from a sketch to a mechanical drawing, then a 3-D modeling and prototype. We would be given a project and would have to complete it using each one of the steps above properly. This really helped me understand the ins and outs of engineering a product.

My Advice to The ACC

Having experience is HUGE to employers! The ACC gives you that leg up over the other people your age competing for that job/internship. I would recommend going out and getting an internship, or even a summer job, in a field related to the one you want to go into. Not only will you get a chance to do something you love, but also it will give you a head start over all the other people trying to get a job in that same field.
